

suppliers had sub-contracted the work to others. As recently as June 19, 2000, the Defense News reported that two German defense industry employees were convicted of selling missile secrets to Russia. A software provider could have easily employed these "spies." Unfortunately, this is not a new phenomenon. On October 24, 1999, as we prepared for the Y2K transition, the Los Angeles Times ran an article citing concerns by security experts that the use of foreign contractors for Y2K solutions could have placed critical systems at risk. The article reports that, in the words of one government security expert, "The use of untested foreign sources for Y2K remediation has created a unique opportunity for foreign countries or companies to access and disrupt sensitive national security and proprietary information systems." The GAO further maintained that background screening policies for personnel involved in Y2K remediation were lacking or inadequate despite at least 85 Federal contracts being completed using foreign nationals.

The Department of Defense routinely purchases software developed by foreign companies. The Department is often unaware of that fact. For many of its unclassified, but critically important, business operating systems, government agencies contract with a systems integrator. The integrator then selects the software system to be installed as part of the operating system. The Agencies are often not aware that the software was developed in a foreign country, by foreign developers, and perhaps, even in a foreign language. I believe that, at a minimum, the provision of software produced by a U.S. company (or at least software controlled by a U.S. company) should be a consideration in the acquisition process. Encouraging the Defense Department (and other Government agencies) to at least consider the origin and ownership of source codes will not eliminate vulnerability, but it is a step in the right direction. Additionally, it reinforces software development as a key component of our defense industrial base. For that reason, I urge the Administration to put in place protocols in the selection process that consider the origin of all source codes used in the development of information systems acquired or developed. This should include those acquisitions arranged via sub-contracts by prime contractors or system integrators.

SUPPORT FOR CHINA COMMISSION INCREASED FUNDING

Mr. BAUCUS. Mr. President, I rise today to speak to the Commerce, State and Justice Appropriations Conference report's recommendation which provides \$500,000 for the congressional-executive commission on China. This noteworthy commission was estab-

lished in Title III of the China/PNTR bill, which the Senate passed with a strong majority and the President signed into law just two weeks ago.

It is my understanding that the Commission would normally require a funding level of at least \$1.3 million. However, this year the conferees allocated a lesser amount based on the fact that the Commission will operate for less than a full year in FY2001.

Without a doubt, we should fully support the Commission at its requested level of \$1.3 million in FY2002 and subsequent years once members have been appointed, staff hired and the operation is fully functional for an entire fiscal year. While the initial request of \$500,000 is sufficient for the start-up operation of the Commission, it falls far short of the amount required by its enabling legislation and our congressional intent.

Passage of PNTR for China is one of the most significant pieces of legislation this Congress has passed in this decade. The Commission will play an essential role in the oversight of its implementation and China's adherence to its international obligations.

Again, Mr. President, I support funding accorded by the CJS Appropriations bill for FY2001 and will further support increased funding of at least \$1.3 million in the next and following fiscal years.

SENATOR DANIEL PATRICK MOYNIHAN

Mrs. BOXER. Mr. President, the Senate will soon bid a fond farewell to one of its most distinguished members, the senior Senator from New York. I rise today to bid him adieu.

As we all know, DANIEL PATRICK MOYNIHAN is the Senate's Renaissance Man, a man of dazzling intelligence and accomplishments in many arenas of public life. A scholar, an author, a teacher, a statesman, a Senator: he is—to paraphrase President Kennedy's comment on Thomas Jefferson—perhaps the most extraordinary collection of talent, of human knowledge, that has ever graced the United States Senate. This body and every one of its members have been touched by his grace, and we shall all be ever the richer for the days he spent with us.

I have enjoyed the additional pleasure of serving with Senator MOYNIHAN on the Environment and Public Works Committee. In past years, as Chairman of the Committee, he raised public awareness on the issue of acid rain. In doing so, he broadened our horizons by greatly expanding our understanding of the far-reaching effects that human actions can have on the environment and the effects that environmental degradation can have on human beings.

Mr. President, I know that Senator MOYNIHAN has much more to offer his country, and I hope that he will long

continue to give the Senate the benefit of his peerless intellect, insight, and experience.

SENATOR RICHARD H. BRYAN

Mrs. BOXER. Mr. President, I rise today to pay tribute to my good friend, California's good neighbor, and our distinguished colleague, Senator RICHARD H. BRYAN of Nevada.

With his impending retirement from the Senate, Senator BRYAN will culminate 36 years of public service at the local, state, and national levels. He has served the people of Nevada as a district attorney, public defender, state legislator, state attorney general, governor, and United States Senator. Throughout his career, he has been known for his intelligence, integrity, and good sense.

During his two terms in the Senate, DICK BRYAN has addressed a variety of national issues without forgetting the people of his state. He has been a leading champion of American consumers, fashioning laws to require air bags in automobiles, protect Internet privacy, reduce telemarketing fraud, and reduce errors in personal credit reports. He has fought for American taxpayers by working to reduce wasteful spending, eliminate special-interest subsidies, and balance the Federal budget.

Senator BRYAN has been a vigilant and tireless protector of Nevada's environment, working to save Lake Tahoe and prevent the construction of a nuclear waste storage facility at the Nevada Test Site. Earlier this month, he won another victory for his home State's environment with the passage of the Black Rock Desert—High Rock Canyon Emigrant Trails National Conservation Area Act, which will provide added protection to nearly 800,000 acres of federal land in northwestern Nevada.

Senator BRYAN is a gentleman, a man known for his ability to work with people of all parties and persuasions. In bidding him farewell, I hope that the Senate will carry on his spirit of comity, courtesy, and bipartisanship.

SENATOR FRANK LAUTENBERG

Mrs. BOXER. Mr. President, I rise today to bid farewell to the senior Senator from New Jersey: my dear friend and distinguished colleague, Senator FRANK LAUTENBERG.

This is a bittersweet occasion for me—sad because FRANK will be leaving us soon, but sweet because he leaves us with so many fond memories and such a great example of what it means to serve the American people through this great institution.

FRANK LAUTENBERG has been one of my closest friends in the Senate. He has also been my colleague, confidante, mentor, and role model. Intensely patriotic and ethical, he takes his role as legislator very seriously without taking himself too seriously. A man of
